KEYSTONE<sup>™</sup> VANESSA<sup>™</sup>  
SPENCE NICHOLSON

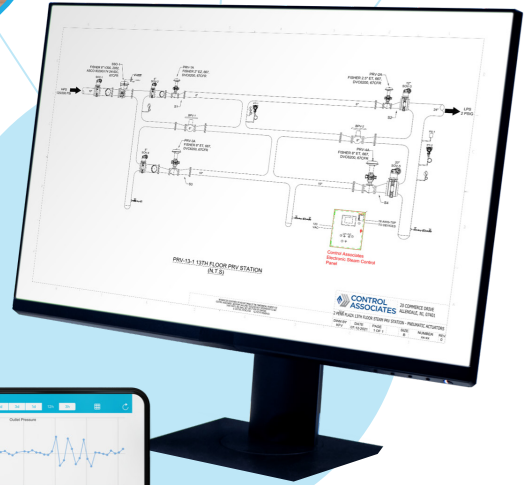

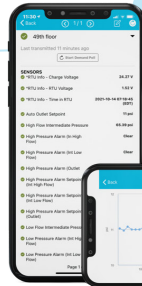

## Steam Specialty & Hydronic Solutions

- Balancing Valves
- PICVs
- Coil Connection Components
- Steam Traps
- Expansion & Ball Joints
- Thermometers & Gauges
- Insulation Blankets
- Humidifiers
- Clean Steam Generators
- Condensate Pumps
- Flash Tanks
- Boilers & Deaerator Tanks
- Hot Water Heaters

## Digital Steam Solutions

- Design/Engineering Support
- Turnkey Installation
- Project Management
- Field Service & Preventative Maintenance
- Cloud-Based Diagnostics & Analytics

## Services & Support

### Maintenance & Repairs

- Steam PRV station maintenance, support, training, and installation for:
  - Digital Valves
  - Pneumatic Valves
  - Pilot Operated Regulators
- On-site and depot repair of all control valves and regulators for steam, gas, and oil
- Troubleshooting, repair, and upgrades for hot water heaters and clean steam generators

### Valve Actuation

Electric and pneumatic actuation, installation, troubleshooting, and repair—on-site or in-house for any valve type

### Energy Audits

- Steam System Walkdowns
- Trap Surveys
- Thermal Energy/Noise Reduction Surveys

### 24/7/365 Emergency Support

Control Associates is a provider of process control systems, valves, actuation, instrumentation, regulators, relief valves, asset reliability, systems integration, manufacturing execution systems, and data management solutions for industrial and commercial customers in the tri-state metropolitan New York, New Jersey, and Connecticut region. Our unique long-term partnership with Emerson and other leading manufacturers enables us to connect customers with innovative technology, engineering expertise, and 24/7 lifecycle support services to optimize the reliability, safety, profitability, and performance of their operations. Our 40,000 sq ft facility is 20 miles from Manhattan, offering local services and support.
