DCMlink offers a uniform and consistent User Interface (UI)

**DCMlink Software**
- DCMlink Software is the command and control software for electric actuators and Electro-Hydraulic Operators (EHO).
- Enables users to configure, calibrate, monitor and diagnose all electric actuators from a central location independent of protocol, actuator or host system.
- Enhances plant productivity by unifying all electric actuators on a common platform while allowing plant operators to gain deep insights into asset status and performance in real-time.
- Provides actuator data gathering, condition monitoring, events log and prioritization of actuator alarms in an unified and consistent user interface.

**Benefits**
- Integrates with Emerson’s PlantWeb™ solution
- Improve maintenance efficiency, and reduce maintenance cost
- Support for WirelessHART, MODBUS and Bluetooth protocols

Emerson DCMlink Software
Emerson DCMlink Software

Simplified Easy to Read Alarms Status
- Up to 53 alarms are reported
- Green & Good status = No Active Alarms
- Active alarms categorized into four types per NE-107

Emerson Business Synergy
- Integrates with Emerson
  - PlantWeb solution
  - AMS Device Manager
  - DeltaV
- PlantWeb compatible alerts, alarms and diagnostics
- Emerson Waveguide compliant
- WirelessHART integration with Rosemount THUM
- Same look and feel (GUI) as Fisher® ValveLink™ software

Products
- XTE3000
- M2CP
- EHO
- TEC2
- MPA
- HQ

Features
- Database
- NE-107
- Scheduler
- PlantWeb™
- Diagnostics

Protocols
- Modbus
- HART
- WirelessHART

Product Portfolio
- EMERSON
- AMS
- DELTAV
- SNAP-ON
- Ovation
- SOLO
