

Reliable Bettis™ Electric Actuators Meet NYC Specs. Field Retrofit Challenges Solved.

Can You Replace Our Actuators Without Having to Remove the Valves?

Absolutely! This commercial property's legacy actuators had failed on its installed base of large diameter butterfly valves. To update this customer's equipment, Control Associates suggested upgrading to a more reliable and robust Bettis product, via a field retrofit—without any need to remove valves from the line.

Control Associates' Reliable Products and Total Service Approach Save the Day

We recommended the Bettis M2CP Electric Actuator—an easy-to-maintain, robust, and reliable electric actuator that fits a broad range of quarter-turn and multi-turn applications, common in commercial real estate properties and hospitals throughout the city.

Bettis M2CP Electric Actuator

Proven Results

\$25K

Cost Savings

**Bettis Field
Retrofit**

Keep Current Valves

**Total Service
Approach**

Single P.O.

The success of this upgrade speaks for itself; this customer has already recommended us for their other buildings. When they need to replace valves or actuators, they call Control Associates. By replacing 4 actuators at a time, this client was able to keep their existing valves and save \$25K over the course of the entire project.
