

3 Great Reasons Why You Should Consider Control Associates' Steam Metering Solutions

1 HIGH QUALITY MEASUREMENT

- **Expanded Measurement Range**
Captures previously unbillable quantities
- **Independent Pressure & Temperature Compensation**
Improves accuracy & response time
- **BTU Consumption Data**
Enables accurate billing of steam usage
- **Real-Time Process Information**
Informs trending and spike usage
- **Tailored To Individual Steam Conditions by Our Experts**
Delivers best performance for system constraints

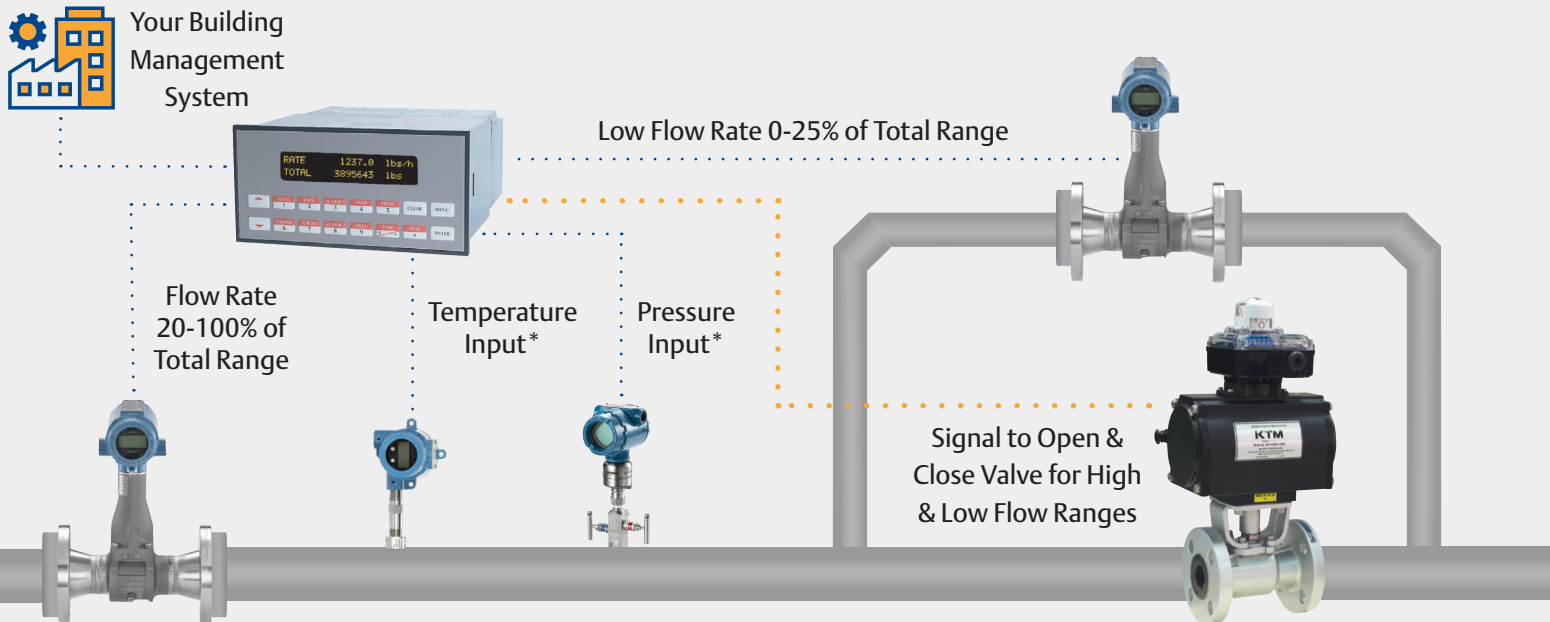

2 LOW COST OF OWNERSHIP

- **Automatic Run Switching**
Eliminates need for manual operation
- **Unaffected by Condensation**
Improved meter longevity
- **No Moving Parts or Impulse Piping**
Greater reliability with fewer failure points
- **Inline Testing & Troubleshooting**
Prevent unplanned shut downs
- **Sensors Isolated From Process**
Allow hot swapping

3 EASE OF INTEGRATION

- **Complete Solution**
Verified interconnectivity of components
- **Designed for Spatial Constraints**
Minimal mechanical rework
- **Project Management**
Control Associates manages deliveries of components and labor
- **Flexible Communication Protocols**
Easy access to high quality measurements
- **Local Technicians**
Startup & commissioning services with 24/7 support (in NYC metro)

Control Associates Linear Manifold Solution

*Pressure and temperature compensation options available.

Lifecycle Services & Support

Control Associates offers a wide range of onsite and shop services, available 24/7, from multiple facilities serving the Greater New York metro area.

- Product Design & Sizing Recommendations
- Startup & Commissioning
- Factory Trained Technicians & Specialists
- Instrumentation Training & Educational Services
- Shutdown/Turnaround/Outage Planning & Services
- Plant, Tank Farm, & Steam Surveys
- Control Panels
- Wireless Network Integration

Industries Served

- Power & Natural Gas
- Refining & Terminals
- HVAC & Utilities
- Chemical
- Water & Wastewater
- Food & Beverage
- Pulp & Paper
- Life Sciences

About Control Associates

Control Associates is a provider of process control systems, valves, actuation, instrumentation, regulators, relief valves, asset reliability, systems integration, manufacturing execution systems, and data management solutions for industrial and commercial customers in the tri-state metropolitan New York, New Jersey, and Connecticut region. Our unique long-term partnership with Emerson and other leading manufacturers enables us to connect customers with innovative technology, engineering expertise, and 24/7 lifecycle support services to optimize the reliability, safety, profitability, and performance of their operations. Our 40,000 sq ft facility is 20 miles from Manhattan, offering local services and support.
