Custom Design & Cloud Solutions

A steam PRV station is a critical system in your facility and we understand its importance. Our team of engineers and technicians work with engineering firms and end users to size, select, and design steam systems—no matter the level of complexity. From single stand-alone valves to multi-flow stations, our experts can develop the right solution for you. Our Digital Steam Solution comes complete with the following features and options:

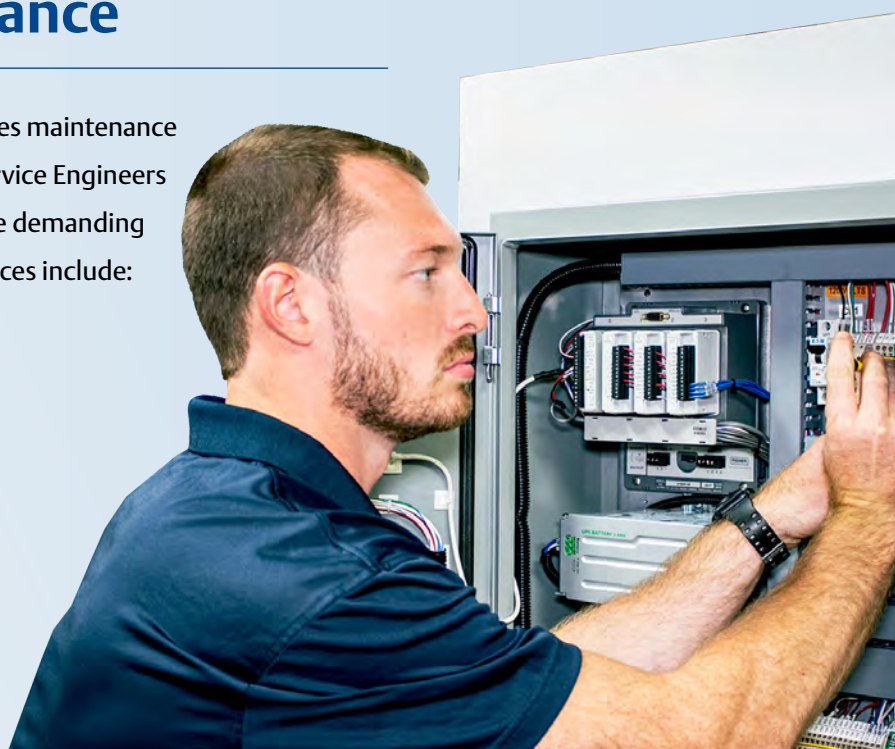

- Easy-to-use touchscreen (HMI)
- Battery back-up
- BMS integration
- Cloud-based diagnostics and analytics

Technical Support & Preventative Maintenance

Even the most reliable industrial equipment requires maintenance over time. The Control Associates team of Field Service Engineers and Technicians are available 24/7/365 to meet the demanding needs of our customer base. Our professional services include:

- Annual preventative maintenance
- Valve/actuator repair
- Turnkey installation and start-up
- Product and system training
- 24/7/365 toll-free support
- Cloud-based troubleshooting

Notable Customers

About Control Associates

Control Associates is a provider of process control systems, valves, actuation, instrumentation, regulators, relief valves, asset reliability, systems integration, manufacturing execution systems, and data management solutions for industrial and commercial customers in the tri-state metropolitan New York, New Jersey, and Connecticut region. Our unique long-term partnership with Emerson and other leading manufacturers enables us to connect customers with innovative technology, engineering expertise, and 24/7 lifecycle support services to optimize the reliability, safety, profitability, and performance of their operations. Our 40,000 sq ft facility is 20 miles from Manhattan, offering local services and support.
