

Control Associates, Your Local Valve Automation Center

We Have the Inventory!
We Automate Valves **Locally.**
We Are **Flexible** for Any Need.

Control Associates has a best-in-class Valve Automation Center with extensive automation and repair capabilities. Our factory-trained technicians typically have experience in the field and with multiple brands. As an Emerson Impact Partner, we have the availability of inventory like no other company in the region.

Here's How We Work:

If you have a repair, our service coordinator will provide an estimate and schedule the job with you. We provide both depot and field repair & startup services.

Our Metro New York Facility

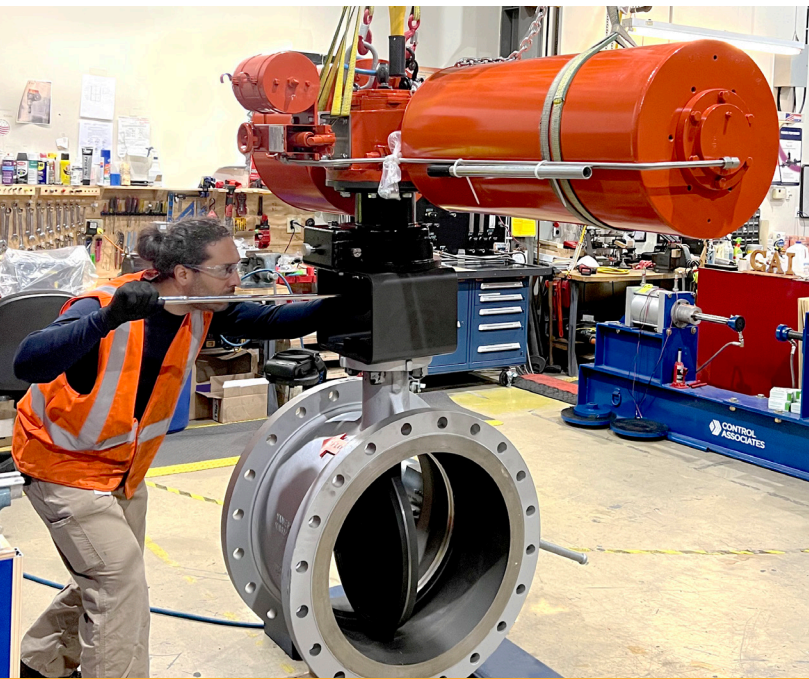

- 40,000 sq. ft. assembly and automation center; extensive local inventory
- Access to \$200M+ inventory through our network
- 6-ton overhead crane
- Multiple 2-ton jib cranes
- Automated valve seat leak test rig
- Full electric and pneumatic actuator capabilities
- Field service capabilities
- Factory-trained technicians
- Full assembly drawings (on request)

At our Valve Automation Center, we can repair your valve, as well as handle projects entailing hundreds of valves. Many times, we can get assemblies through the warehouse same day or next day when the components are in stock or within our network. Regardless of your needs, you can count on Control Associates as your partner.
