Services & Support

In-House Expertise

- 24/7 After Hours & Emergency Support
- Local Inventory
- Valve Automation
- ASME Certified Safety Relief Valve Repair Center
- OEM Certified Repair Facility Servicing Control Valves, Isolation Valves, Regulators & Actuators
- Factory Trained Staff
- Application Engineering
- Control Systems Engineering
- Custom Panel Design, Drawings & Build
- Project Management & Engineering
- System Lifecycle Support
- Factory Acceptance Testing

On-Site Services

- Startup & Commissioning
- Plant Assets Review/Plant Walk-Down
- Outage & Turnaround Management
- Control, Isolation, Actuation & Safety Relief Valve Repair
- Actuation & Instrumentation Calibration
- Valve Diagnostics
- Flow Computer & RTU Support
- Control System Services
- Automation Installation & Troubleshooting

Company Overview

Control Associates is a provider of process control systems, valves, actuation, instrumentation, regulators, relief valves, asset reliability, systems integration, manufacturing execution systems, and data management solutions for industrial and commercial customers in the tri-state metropolitan New York, New Jersey, and Connecticut region. Our unique long-term partnership with Emerson and other leading manufacturers enables us to connect customers with innovative technology, engineering expertise, and 24/7 lifecycle support services to optimize the reliability, safety, profitability, and performance of their operations. Our 39,000 sq ft facility is 20 miles from Manhattan, offering local services and support.
